EDUCATION

BCA
Shoolini University
2023 - 2027

SKILLS

LANGUAGES

Hindi (Native)
English (Fluent)

PROFILE

BCA student building full-stack MERN applications from the ground up — from database design and authentication to deployment. Comfortable across the stack: React on the frontend, Node/Express/MongoDB on the backend, and Tailwind CSS for clean, responsive interfaces. Eager to bring that hands-on project experience into a real engineering team.

PROJECTS

Airbnb Clone

LIVE

Node.js • Express • MongoDB • EJS • Tailwind CSS

- Built a full-stack listings platform with host/guest auth and session management
- Implemented image uploads, MongoDB data modelling, and server-rendered EJS views
- Deployed live on Render with environment-based configuration for production

Weather Forecast App

LIVE

React • OpenWeatherMap API • Vite

- Real-time weather lookup by city using a public REST API
- Managed API keys securely via environment variables
- Responsive UI showing temperature, humidity, and wind speed

Currency Converter

WEB

JavaScript • Tailwind CSS • REST API

- Live currency conversion across multiple countries with flag-based selectors
- Clean, responsive single-page interface built with a utility-first CSS workflow

STRENGTHS

- Full project lifecycle: design, build, debug, and deploy independently
- Git & GitHub workflow for version control and collaboration
- Fast learner — self-taught through hands-on project building
